

ERDAS
Image Web Server
System Requirements

ERDAS Image Web Server

Hardware requirements will vary based on the protocol mix employed as well as overall usage.

Recommended Hardware for basic installation

Dual processor
2GB Ram

Data can be stored on a NAS / SAN device, but should be configured to ensure the server has fast access to data.

For small installations, lower-end hardware or shared hardware can be used. Image Web Server is very resource efficient.

Operating Systems Supported:

- Windows 2000 Server
- Windows 2003 (32 and 64 bit)
- Windows 2008 (32 and 64 bit)
- Sun Solaris x86
- Linux Red Hat

Desktop systems are also supported include Windows 2000, XP (32 and 64bit) and Vista (32 and 64bit)
